

MIRZA RAHEEM BAIG

SOFTWARE DEVELOPER | FULL STACK DEVELOPER

Phone & WhatsApp: +91 9959014994 | Email: raheembaig825@gmail.com | LinkedIn : Raheem Baig
Portfolio : Raheem-Portfolio | Github : Raheem-Baig1210 | Address : Golconda, Hyd, India, 500008.

PROFESSIONAL SUMMARY

Enthusiastic Computer Science Engineer with a strong foundation in software development, web technologies, and machine learning concepts. Skilled in MERN Stack, Python, and JavaScript, with hands-on experience in building secure, scalable, and user-focused applications. Adept at problem-solving, collaborating in agile environments, and eager to contribute to dynamic roles in Software Engineering, Full- Stack Development, or Artificial intelligence (AI).

TECHNICAL SKILLS

- | | | | |
|----------------|---------------|--------------|-----------------|
| ▪ Node Js | • NextJS | • Git | • AWS(EC2) |
| ▪ MongoDB | • NestJS | • Postman | • Linux |
| ▪ Tailwind CSS | • TypeScript | • Jupyter | • Windows |
| ▪ CSS 3 | • PostgreSQL | • Notebook | • .Net (Basics) |
| ▪ React Js | • SQL | • Power BI | • Java (Basics) |
| ▪ HTML 5 | • Claude Code | • Canva | • MS Excel MS |
| ▪ Java Script | • Python | • Express Js | • Word |

CORE COMPETENCIES

- | | |
|--------------------------|---|
| ▪ Full Stack Development | ▪ Authorization and Authentication using JWT Tokens |
| ▪ Protected Routes | ▪ Rendering Workflow |
| ▪ RESTful APIs | Optimization for Luxury Projects |

PROFESSIONAL EXPERIENCE

Full Stack Developer | Web Developer | Career Guidance Council
Hyderabad, India

Jan 2025 - October2025

- Developed a complete full-stack web application for a tuition center using the MERN stack (MongoDB, Express.js, React.js, Node.js), delivering a seamless and user-friendly platform for students, tutors, and administrators.
- Implemented secure authentication and authorization using JWT and bcrypt, enabling role-based access control (Admin/Tutor) to ensure data privacy, protected routes, and controlled feature accessibility.
- Designed and built scalable RESTful APIs to manage key modules such as attendance tracking, user management, class schedules, and reporting—ensuring clean, modular, and maintainable backend architecture.

Software Developer | Software Engineer | Namya IT
Hyderabad, India

March 2026 - Present

- Developed and maintained full-stack web applications using MERN Stack, Next.js, NestJS, and TypeScript, building scalable and maintainable solutions.
- Built and integrated secure RESTful APIs, optimized database operations with MongoDB, and improved application performance.
- Leveraged Claude Code and other AI-powered development tools to accelerate development, streamline debugging, and enhance code quality.
- Collaborated with the development team in an Agile environment, participating in feature development, code reviews, and bug fixes.

KEY PROJECTS

- **Quiz Application | December 2024** : I developed my first web development project using pure HTML, CSS, and JavaScript by creating an interactive quiz application. The app displays questions sequentially with four multiple-choice options and records user responses in real time. It evaluates answers as the user progresses and presents a final results summary at the end. This project strengthened my understanding of core web technologies, DOM manipulation, event handling, and building functional features without any external libraries or frameworks.
- **Mohalla Tuition Center | May 2025** : Developed a full-stack web application for a tuition center using the MERN stack, offering a smooth platform for students, tutors, and administrators. Implemented secure authentication and role-based access control with JWT and bcrypt to ensure data privacy. Built scalable RESTful APIs for attendance, user management, class schedules, and reporting. Optimized MongoDB schema design and queries for efficient data storage and retrieval. Developed responsive UI components using React, React Hooks, and Context API for real-time updates. Assisted in testing and deployment, ensuring smooth API integration, debugging issues, and improving overall system performance.
- **School CRM System | MERN Stack | October 2025** : Developing a scalable School CRM system using the MERN stack to manage operations across multiple schools while maintaining data consistency and secure access. Implemented authentication and authorization using JWT to ensure protected routes and role-based access. Building RESTful APIs to handle student records, staff management, fee tracking, attendance, and communication modules. Designing efficient MongoDB schemas to support multi-school data separation, fast retrieval, and reliable storage. Creating responsive and dynamic UI components with React to provide an intuitive dashboard experience for administrators, teachers, and staff.

Projects Done as a Freelancer

- Mestar Energy
- Witcosa

EDUCATION & CERTIFICATIONS

- **High School** | Narayana Junior College, Hyderabad, India | 2019
- **Bachelor of Engineering | Computer Science and Engineering** | Osmania University, Hyderabad, India | 2025
- **Relevant Coursework:**
 - MERN Stack Development
 - Software Engineering
 - Computer Networking
 - Data Structures and Algorithms

LANGUAGES

- English : Fluent
- Hindi / Urdu : Native
